

Guideline to Pool Fencing Regulations

Pool Gates:

- Minimum 1200mm high and at least a 1200mm arc from any permanent projection or object permanently placed on the ground outside.
- Must open outward, away from the pool area.
- Must self-close and latch into position.
- Any release latch is required to be 1500mm above ground level/or 300mm down the inside of the gate ($1200+300=1500$).
- No gaps under the door greater than 80mm.
- Minimum 12mm thick Toughened Safety Glass.

Pool Fencing:

- Minimum 1200mm high and at least a 1200mm arc from any permanent projection or object permanently placed on the ground outside.
- No gaps between glass panels or the ground of greater than 80mm.
- Minimum 12mm thick Toughened Safety Glass.
- Windzone tested to .35kn.
- Relevant fixing detail/method of supporting the glass with an accompanying PS1.
- Where local fencing is also balustrading (protecting a fall of 1000mm or more) it must comply with the "Balustrading" regulation.
