

Decor Designer Slider Installation Instructions

1. Mark out the bar fixing points on the wall (max 400mm centres). Check the fixing is suitable.
2. Fix the bar fittings to the wall and ensure all are aligned with each other.
3. Loosen all bottom screws on the wall fittings and allow front clamps to rotate down.
4. Lay the bar on the ground and position the stops on the bar as needed.
5. If a wall support is being used, slide the bar into the bracket first. Hold the bar in place, rotate the clamp back into position, tighten screws. Repeat until all is complete.
6. Position the door guide on the ground next to the wall. Screw into place.
7. When installing the door, position the door in the guide then lift until rollers are in position on the bar.
8. Adjust the anti-jump by lifting the glass as high as possible within the hanger brackets.
9. Check doorstops are positioned correctly. Adjust and tighten.
